A bright way to support our community!

"Averi and I are proud to help launch Synergy Solar's Community Solar program—that donates needed money to the Sebastopol Education Foundation. We have three children in the Sebastopol school system and understand the growing need for funding. As a local green business owner, and Go Local Sonoma Board member, it made sense to reduce our carbon footprint and go with Synergy, a local company. Our solar installation experience was flawless with virtually no money out of pocket. Our community now has a venue to reduce energy expense, protect the environment, and give significant amounts of money to our local schools--a win/win/win situation. The Synergy staff made the entire process easy from start to finish, and we are pleased with their design, installation and the service. Our solar installation has added to the value to our home, reduced our monthly expenses, helped to preserve the environment, and supports our schools." Scott Leonard

Synergy is a Sebastopol based solar installation company serving Sonoma County. We are primarily a word of mouth company focusing our resources on our customers and local community. Please join us in reaching our goal of making a difference for Sebastopol children as well as contributing to local economy and the environment.
